Software Developer

Lat Phrao 71, Soi Nak Niwas 53, Bangkok 10230 | wave001133@gmail.com , Phone : +66 996769470

SUMMARY

Dynamic Web Developer possessing a unique blend of technical precision and creative vision. Proven capability in navigating complex system logics—from ERP marketing to sustainable engineering solutions. I am a fast learner with a passion for modern web technologies, dedicated to crafting intuitive user experiences while maintaining robust backend structures. Ready to leverage my 2 years of expertise to tackle new, challenging digital frontiers.

WORK EXPERIENCE

Full Stack Developer

May 2024 - Present

Poontana Marketing Co.,Ltd

- Developed scalable RESTful APIs and GraphQL endpoints with full CRUD functionality; applied OOP and SOLID principles to design maintainable and modular backend systems integrated with client.
- Implemented real-time messaging systems using Socket.IO, enabling bidirectional communication for features such as live chat, notifications, and event-driven updates.
- Leverage Vue and Next.js to develop scalable, performance-driven applications with optimized SEO and SSR capabilities. Passionate about building reactive UI systems and clean architecture that convert complex business workflows into elegant user experiences.
- ERP: Marketing System Core Modules: Warehouse, Products, Sales, Purchasing, Quotation, Service
- ERP: Sustainable Building Solutions System Core Modules: Customer Visit Tracking, Site Survey Planning, and Installation/Maintenance
- Built and maintained CI/CD pipelines (GitHub Actions, Jenkins) with automated testing, build validation, and cloud-based deployment.
- Responsive web interfaces using MUI, Ant Design, and Tailwind CSS.
- Designed and implemented a reusable state management layer with Axios and Zustand/Pinia, reducing duplicated API logic, improving data consistency across components.
- Designed databases from requirements through entities, relationships, fields, normalization, and scalability considerations.
- Gathered client requirements and designed system architecture.

Internship Developer

Nov 2023 - Feb 2024

Dexon Technology PLC

- Developed a high-precision web application for calculating the remaining service life of industrial piping and storage systems.
- Translated complex engineering formulas into seamless, interactive UI components, ensuring data accuracy and user-friendly workflows.
- Bug Resolution & Optimization: Proactively identified and resolved critical frontend bugs,improving

SKILLS

Languages	• JavaScript ,TypeScript , SQL , NoSQL, Tailwind CSS
Tools/Frameworks	• NodeJs , VueJS , React , NextJS , NestJS , Prisma , Zustand , Pinia
Databases & ORM	• MySQL , MongoDB , Postgres , Prisma , Sequelize
Other Skills	• Github , Docker , Firebase , Ubuntu (Linux) , AWS , OAuth , JWT

EDUCATION

Aug 2019 - Feb 2024

Bachelor of Science in Technology

Rajabhat Maha Sarakham University

- GPA: 3.64 , Information Technology
